The Little Plant
Small effort. Big changes.
1 A small beginning
Riya found a tiny plant in her balcony. She decided to take care of it, even though it was just a small seedling.
2 Through every season
She watered it, gave it sunlight, and watched it grow — even on rainy days, when it needed extra care.
3 A beautiful change
Months later, the little plant bloomed. Riya realized — just like the plant, good things grow with care, patience and consistency.
Good Things Take Time

THE SOLAR SYSTEM
Our Cosmic Neighborhood
8 planets • 1 star • Countless wonders
The Sun
A hot ball of gas, mainly hydrogen and helium. It provides light and energy to the entire solar system.
Inner Planets (Terrestrial)
Mercury, Venus, Earth, Mars
• Rocky surface
• Smaller size
• Closer to the Sun
Outer Planets (Gas Giants)
Jupiter, Saturn, Uranus, Neptune
• Made mostly of gas and ice
• Much larger size
• Farther from the Sun
Mercury
Venus
Earth
Mars
Jupiter
Saturn
Uranus
Neptune
Why It Matters
Helps us understand our place in the universe and search for life beyond Earth.
Fun Fact
A day on Venus is longer than its year!
Did You Know?
Jupiter has more than 90 moons!
Exploration
Missions like Voyager, Cassini and Juno help us uncover the mysteries of space.
Our Home
Earth is the only known planet with life — let's protect it!
SAME SKY • SAME UNIVERSE • ONE HOME
